

I am writing to provide comments to the FCC on the E-Rate NPRM, proceeding 13-184. E-Rate has been very important to Webbers Falls Public Schools (Muskogee Co. District) because it has helped our students and teachers gain access to a wealth of online resources, communicate and collaborate, and develop the 21st century skills necessary for college and career. However, E-Rate funding levels have not kept pace with my Webbers Falls Public School's current bandwidth needs. It has caused slow interaction for my son and his friends. I urge you to raise the E-Rate funding level to at least \$5 billion per year, which is close to the average demand level for each of the past two years.

As a parent, teacher, and Library Media Specialist in Oklahoma, I know that seamlessly infusing digital learning throughout the curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high-speed broadband is the key to allowing modern teaching and learning to occur in all schools across the country.

In my school district of Oklahoma for me as a teacher, parent, & Library Media Specialist, we use digital learning to (personalize learning, provide online classes, meet Common Core State Standards, administer online assessments, make data-driven decisions, etc.).

The E-Rate program has been a phenomenal success in bringing internet access to almost every classroom in America. In the last funding cycle, applications from schools and libraries requested a total of more than \$5 billion—twice the amount of available funding. I respectfully urge the FCC to increase funding for the E-Rate program to at least \$5 billion to meet this demand. All students need access to high-speed broadband. Our nation's future depends on their success."
